

GUIDELINES ON WRITING YOUR HEALTH AND WELLNESS VISION

1. WHAT IS A HEALTH AND WELLNESS VISION

A health and wellness vision is a clear, personal statement that describes the healthier, more energized, and more balanced version of yourself that you want to become. It is not simply a goal such as “exercise more” or “eat better.” Instead, it paints a meaningful picture of how you want to feel, live, think, move, relate to others, and care for yourself when your health and well-being are aligned with your values.

2. WHY DOES IT MATTER

A strong wellness vision gives direction before goals are created. Goals are the steps, but the vision is the destination. When the vision is personally meaningful, it can help you stay focused during busy or stressful periods, make choices that align with your priorities, and return to your intentions after setbacks. In health and wellness coaching, a vision also helps connect behavior change to deeper motivators such as values, identity, purpose, strengths, confidence, and quality of life.

3. KEY FEATURES OF AN EFFECTIVE WELLNESS VISION

- **Personal:** It reflects your own definition of health and well-being, not someone else’s expectations.
- **Positive:** It focuses on what you want to move toward rather than what you want to avoid.
- **Values-based:** It connects health choices to what matters most, such as family, service, energy, confidence, faith, growth, independence, or peace.

- **Strength-focused:** It recognizes the qualities, skills, support systems, and past successes that can help you move forward.
- **Clear and memorable:** It should be unambiguous and can easily be remembered by you as well as communicated to others
- **Flexible:** It can evolve as your life, priorities, health needs, and self-awareness change.

4. REFLECTION PROMPTS

- What does “being well” , “being healthy” mean to me personally?
- When I am at my healthiest, how do I feel physically, mentally, emotionally, and spiritually?
- What do I want more of in my life, and what do I want less of?
- What strengths have helped me make positive changes in the past?
- How will my life, relationships, work, and sense of purpose improve when I am living this vision?

5. LENGTH

- **For your first coaching session, the length does not really matter**
- **Your final H & W vision statement should be clear, memorable and fall within the above-mentioned guidelines provided.**
